

**Conditions for Release, Rules and Restrictions Applying to the
ROSTOV UNIT2 benchmark on
reactivity compensation with diluted boron by stepwise insertion of control rod cluster
into the VVER-1000 core**

The data and other experimental information are released under the following conditions:

- The data and information remain the property of the State Atomic Energy Corporation "Rosatom" (ROSATOM).
- The data and information are exclusively released to recipients who are participating in the ROSTOV-2 Benchmark Study.
- Recipients of the data will use them exclusively for testing the 3D multi-physics codes and comparing the advantages and disadvantages of traditional multi-physics codes with novel high fidelity multi-physics code systems and methods.
- Recipients agree not to make copies of the information and not to further distribute or sell it to third parties.
- Recipients agree to provide feedback on deficiencies or errors they may find in the data.
- Transfer of the information to a user in a given establishment confers only the right to use the information within that organisation for the declared purpose.
- Recipients agree to inform ROSATOM before publishing any study results for which the ROSTOV-2 benchmark data have been used.
- Data and its documentation are provided on the understanding that whenever the use of these obtained through the NEA, or locally modified versions of them, results in a publication (a journal, conference proceedings, laboratory report, book etc.), the data and their author or laboratory of origin shall be acknowledged in the publication.
- Recipients agree to provide NEA with output results from their analyses as specified in the benchmark

DISCLAIMER

Neither the Organisation for Economic Co-operation and Development, nor ROSATOM, nor any person acting on behalf of any of these organisations assume any liability with respect to the use of, or for damage resulting from the use of, the data and information released.
